**Notes:** Pronunciation written using the Merriam-Webster phonem set. A full pronunciation guide is available at <http://www.m-w.com/help/pronguide.htm> — a brief version, with audio, can be found at <http://www.m-w.com/pronsymbols.htm>. Whenever a word can be used both as a noun and as an adjective/adverb, both versions have been listed as far as possible.

To the best of my knowledge, the above are the American (approximations of the English) versions of the words.
